

TIBCO Enterprise Message Service (EMS)

- **Java Message Service(JMS) Provider** from TIBCO
 - Implements the JMS Protocol
 - JMS messaging for applications and adapters

The screenshot shows a window titled "EMS Server". The menu bar includes "File", "Edit", "View", "Search", "Terminal", and "Help". A status bar at the bottom says "TIBCO Software Inc.", "TIBCO Education Programs", and "TIBCO". The main area displays a terminal-like log output:

```

TIBCO Enterprise Message Service (EMS)

TIBCO EMS is a JMS Server available from TIBCO.

This implementation is fully compliant with the JMS 2.0 specification. In addition, it offers high-performance and numerous enhancements.
